

Husky Expedition Lapland

12 days (9 days with the huskies)

During this special spring time husky safari you will experience not only the co-operation with lovely, eager huskies, but also the long (and hopefully sunny!) days of the spring. You will spend 9 days in the beautiful hill scenery and you will drive your own team of 6 dogs covering up to 250 km (weather permitting).

Day 1

Arrival at Kittilä airport. Transfer to the Husky base centre (around 90 mins). Get together with your team and the guide. Dinner at the centre. Overnight in cosy hotel rooms or in cabins.

Day 2

After breakfast you will be provided with the safari equipment and then you will meet the lovely huskies. Together we will pack the sleds and practise how to drive a dog team. After lunch we begin the safari.

Days 2 to 10

Our safari will take you from Muonio to Kilpisjärvi - the last village at the edge of northwest Finland – next to the Norwegian and Swedish borders. The daily distances will vary from 30 to 70 km depending on weather conditions and the skills of the participants; pauses will be made as required. During this safari we spend the nights in small wilderness huts and in tents. On some evenings we will return to the same hut or tent, because there are so many beautiful spots to visit along the route.

The days are long and mostly warm, even the nights will be light and it will be possible to drive a night safari also. We will drive in the forest, over the frozen lakes and along the rivers; we will take you also up to the bare fell region. All meals will be prepared together, lunch by an open fire in the wilderness, breakfast and dinner in wilderness huts and in tents. Each participant will also take care of his/her own dog team. In the evening of the 10th day we will arrive in Kilpisjärvi and spend one night there in cabins.
